

Orchidology's Own Hybrids

We have the following seedlings available, our seedlings have been hardened off for a period of 6-12 months and are a cost effective way to build an Orchid collection. There are even flowering size plants. Available in 6-8cm pots/small baskets, or mounted. Where we can we have provided potential progeny descriptions as well as a picture of the expected outcome, progeny could vary from what we describe depending on genes and variance somewhere in the parents ancestry. New seedlings will be added from time to time, please enquire at paul@orchidology.co.za / www.orchidology.co.za
