

Oncidium Hybrids

We have the following hybrids available, our seedlings have been hardened off for a period of 6-18 months and are a cost effective way to build an Orchid collection. Seedlings are priced at R60-100EACH . Many are already flowering size , others will flower in 6-18 months. Available in 6-8cm pots/small baskets, or mounted. Where we can we have provided potential progeny descriptions as well as a picture of the expected outcome, actual parents or first flowering examples, progeny could vary from what we describe depending on genes and variance somewhere in the parents ancestry . Many of the oncidiums are first of their types and won't be found elsewhere . New seedlings will be added from time to time , please enquire at paul@orchidology.co.za / www.orchidology.co.za
